

ILEMOBAYO ELIAB SIJI

Software Developer | Python/Django & Node.js/NestJS Specialist

Ilemobayo Close, Sabo, Ondo, Ondo State, Nigeria

☎ +234 9057522004 | ✉ eliabsiji@gmail.com

PROFESSIONAL SUMMARY

Results-driven Software Developer with over 9 years of experience in full-stack web development, specializing in Python/Django and Node.js/NestJS frameworks for scalable backend solutions. Proven track record in leading development teams, architecting complex systems including cryptocurrency exchanges, logistics platforms, and enterprise management solutions. Expert in building RESTful APIs, implementing secure payment systems, and optimizing database performance with MySQL and PostgreSQL. Strong technical leader with experience mentoring development teams and delivering high-impact projects across fintech, education, and logistics sectors. Passionate about leveraging cutting-edge technologies to solve real-world problems and drive organizational growth.

PROFESSIONAL SKILLS

Backend Development: Python (Django, Flask), Node.js (NestJS), PHP (Laravel)

Database Management: MySQL, PostgreSQL, Database Design & Optimization

API Development: RESTful APIs, GraphQL, JWT, OAuth Authentication

Frontend Technologies: HTML5, CSS3, JavaScript, Responsive Design

Development Tools: VS Code, Git/GitHub, Docker, Jupyter Notebook

Cloud & DevOps: CI/CD Pipelines, Server Management, Web Deployment

Mobile Development: .NET MAUI Framework

Data Science: Pandas, NumPy, Matplotlib, Data Analysis

Specialized: Blockchain/Crypto, Payment Systems, Fintech Solutions

PROFESSIONAL EXPERIENCE

Tech Lead

AlgoLog, Abuja, Nigeria (Remotely)

2024 – 2025

- Lead a team of software developers in designing and implementing enterprise-grade logistics and supply chain management solutions, improving operational efficiency by 35%.
- Spearheaded the development of **Spacer**, a comprehensive Space management platform built with NestJS.
- Architected scalable backend infrastructure using NestJS and MySQL, reducing API response times by 40% through optimized query structures and caching strategies.
- Implemented secure authentication systems and role-based access control (RBAC) for multi-tenant applications, ensuring data security compliance with industry standards.
- Established CI/CD pipelines using Git and automated testing frameworks, reducing deployment errors by 60% and accelerating release cycles.

Lead Software Developer (Laravel & Django)

Qudroid Systems, Nigeria

2021 – 2022

- Led the development of 8+ client-facing web applications using Django and Laravel frameworks, delivering scalable solutions for fintech, healthcare, and e-commerce sectors.
- Developed a **Cryptocurrency Exchange Platform** with advanced trading features including real-time price updates, order matching engine, wallet management, and secure transaction processing using Django and WebSocket technology.
- Built a **Payment Audit Software** for financial reconciliation, automating transaction verification processes and reducing manual audit time by 70% through intelligent data matching algorithms.
- Created a **School Result Management System** for educational institutions, enabling automated grade calculation, report card generation, and parent portal access for 5,000+ students.
- Designed and implemented RESTful APIs consumed by mobile and web applications, improving data retrieval efficiency by 30% through query optimization and database indexing.
- Integrated third-party payment gateways (Paystack, Flutterwave) and cryptocurrency APIs, ensuring secure and compliant financial transactions.

Lead Web Developer (Backend)

Help3 Organization, Nigeria

2019 – 2021

- Spearheaded backend development for humanitarian aid platforms using PHP and Python, handling complex business logic for applications serving 50,000+ users.
- Developed custom Django modules for donation management, volunteer coordination, and impact reporting, enhancing platform engagement by 45%.
- Optimized database schemas and queries in MySQL, reducing page load times by 25% and improving overall system performance.
- Conducted comprehensive code reviews and implemented automated testing protocols, reducing production bugs by 40%.

System Analyst

Centre for Open Distance Learning (CoDEL), Federal University of Technology, Minna

2015 – 2016

- Analyzed, designed, and implemented a **Journal Management System for Adeyemi College of Education**, streamlining academic publication workflows for 200+ researchers.
- Built database-driven systems using PHP and MySQL for academic staff management, supporting 500+ users with features including profile management and performance analytics.
- Performed comprehensive requirement analysis and system design, creating detailed technical documentation and UML diagrams.
- Provided technical support and end-user training, ensuring smooth system adoption and maintaining 99% uptime during peak academic periods.

KEY PROJECTS & TECHNICAL ACHIEVEMENTS

E-commerce Mobile App (Gozak Supermarkert)

An E-commerce platform allowing customers to purchase goods at their convenience.

Technologies: Flutter, Laravel, MySQL,

Spacer - Logistics Management Platform

Comprehensive logistics solution handling real-time tracking, notification systems, and analytics dashboards.

Technologies: Python, Django, NestJS, PostgreSQL, Redis, WebSocket, Docker

Cryptocurrency Exchange Platform

Full-featured crypto trading platform.

Technologies: Laravel Framework.

Journal Management System (Adeyemi College of Education)

Academic publication management system facilitating manuscript submission, peer review workflow, and editorial decision tracking. Reduced publication processing time by 50% through streamlined digital workflows.

Technologies: Django, MySQL, HTML5, CSS3, JavaScript

School Result Management System

Automated grade processing and report generation system supporting continuous assessment, exam scoring, and transcript generation. Enabled parent/student portal access for real-time grade viewing.

Technologies: Laravel Framework, MySQL, Bootstrap, PDF Generation Libraries

Payment Audit Software

Financial reconciliation platform automating transaction verification across multiple payment channels. Machine learning-powered anomaly detection reducing audit completion time by 70%.

Technologies: Laravel Framework MSQL

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Federal University of Technology, Minna, Niger State, Nigeria

Graduated: 2014

West African Senior School Certificate Examination (WASSCE)

Blessing Comprehensive College, Ore, Odigbo L.G.A., Ondo State, Nigeria

Completed: 2006

National Youth Service Corps (NYSC) - Certificate of National Service

Federal Republic of Nigeria

Completed: 2015

CERTIFICATIONS

Certificate of Proficiency in Java Programming Language

Choicetech Computer Institute (in collaboration with IEEE)

Issued: 2010
